

1) Why did you choose NMS?

I choose it because I heard great things in a conference about Dr. Ogawa and his team. And it was a dream of mine to go.

2) How was your study in Japan?

It was the greatest experience in my life, I only wish I have applied to more months, 3 months were too short. I learn about the health system in Japan and the way they work and I'm really impressed.

3) How was your life in Japan?

I had the scholarship so I lived in the NMS dormitory and it was so awesome. I had a lot of mates as neighbors and we even travel together. I knew about the simple daily life in Japan, I'll never forget how clean and secure it was.

4) Any comment on NMS?

I only have gratitude for the hospital and the workers and all the people who helped me in making the most rewarding memories.

5) Do you have a message for people who are interested in studying at NMS?

Please try it! apply it! you'll never regret it. I know it can be intimidating at first, but you will learn a lot and make friends and memories for a lifetime.

6) Memories of Japan:

Going every day to the hospital in the train and everyone was so silent, it gives me peace.

Learning a few words in Japanese and saying hello and goodbye to everyone.

Making new friends from a lot of countries and learning so many different cultures and health systems. learning about scars treatments so beautifully.

Travel with my friends and just be there.
